

HEALTH, SAFETY & ENVIRONMENTAL AWARENESS POLICY

NDE approach

The NDE Group is dedicated to its aim to protect and create a safe working environment for all. It is the aim of NDE to ensure personnel working on our behalf take heed of all safety, health and environmental programmes in place within our workplace and those of the vendors being visited.

NDE Company responsibilities

The Company recognises its moral responsibility in ensuring the health and safety of employees or freelance personnel contractors on company business or to others during visits to NDE offices.

Health & Safety responsibilities include;

- Instruction of employees and freelancers as necessary to ensure their understanding of health, safety & environmental issues in the workplace.
- Ensure compliance with the statutory requirements for occupational safety and health in the workplace.
- Ensure instructions regarding health and safety are posted in conspicuous places.
- Ensure work place equipment and plant are safe and without risk to health.
- Ensure any work place under the company control has safe means of access and exit.
- Ensure employee practises are of a safe nature such that they will not endanger the health of others

Environmental responsibilities practised by the company offices are;

- Use of paper from sustainable forests and recyclable paper and packaging
- Use of duplex printers
- Separation of paper, plastics and metals for recycling
- Use of low ozone emission printers and non CFC emission devices
- Use of non pollutant cleaning chemicals
- Use of Energy saving devices

Remember thinking safe, and not taking for granted the environment we live in as being an ever renewable resource will ensure our own personnel well being and the well being of future generations to come who will carry on what we have started. Our safety, health and environmental awareness goals have been set and we at NDE aim to attain and surpass those goals if at all possible.
